Deemantha Gunasekara

IT Undergraduate | Aspiring DevOps Engineer

gunasekarapdvp@gmail.com | 076 173 5538 | Boralesgamuwa, Sri Lanka

LinkedIn | GitHub | Portfolio

Professional Summary

Motivated and enthusiastic individual with a strong interest in software development, DevOps and cloud computing. Currently building a foundation in full-stack web technologies and version control through academic projects and self-learning. As a second-year undergraduate, I am eager to gain practical industry experience, learn from experienced professionals and develop my technical skills by contributing to real-world projects. Seeking an internship opportunity where I can apply my knowledge, embrace new challenges and grow as a software or DevOps engineer.

Education

BSc (Hons) Information Technology and Management, 2025 – Present
University of Moratuwa - Second year Undegraduate.
Current GPA - 3.8/4.0

G.C.E. Advanced Level, Commerce Stream, 2021 – 2023
Ananda College, Colombo 10 —
Achieved 3 A passes in Accounting, ICT and Economics.

Projects

SiteTrace — Multi-Tenant Operational SaaS & Mobile Sensing Platform 07/2026 – Present

- SaaS Operations Platform: Built a multi-tenant platform (React 19, NestJS, PostgreSQL) that digitizes industrial field operations with dynamic form configuration and role-based operational dashboards.
- Zero-Hardware IoT & Offline Sync: Engineered a React Native client enabling worker inspections and autonomous stationed phone sensing, backed by local SQLite caching and resilient retry sync for low-connectivity environments.
- Secure Architecture & Real-Time Rules: Implemented strict tenant data separation using PostgreSQL Row-Level Security (RLS) and an event-driven automation engine for real-time anomaly detection and alert dispatching.

KickBots – Microcontroller-Based Robot Football System — 07/2025 – 05/2026

- Designed and built an Arduino-based robot football system in which robots are driven in real time through handheld wireless controllers.
- Implemented wireless controller-to-robot communication using nRF24L01 radio modules.
- Developed embedded C/C++ control logic for motor control, sensor input handling and actuator operation.
- Integrated stepper motors, sensors and actuators into a working hardware platform, including wiring, testing and debugging.
- Technologies: Arduino, C/C++, nRF24L01, Stepper Motors, Embedded Systems

Technical Skills

- Languages: Java, TypeScript, JavaScript, C/C++, PHP, SQL, HTML5, CSS3
- Frontend & Backend: React, Next.js, Node.js, Express.js, Spring Boot, Tailwind CSS
- Cloud & DevOps: Docker, AWS (Pipelines & Basics), Git, GitHub, Linux,
- Databases: PostgreSQL, MySQL, MongoDB
- Soft Skills - Problem Solving ,Teamwork , Communication

Professional Experience

Third Space Global, **Online Mathematics Tutor(UK Curriculum) —** 01/2025 – 08/2025

- Delivered 1-on-1 virtual STEM and mathematics tutoring to students in the United Kingdom.
- Developed strong analytical communication and problem-solving techniques..

Courses & Certifications

Introduction to DevOps, *IBM* 05/2026

Arduino Bootcamp: Learning Through Projects, *Packt* 12/2025

Machine Learning Introduction, *IBM* 11/2025

C Intermediate, *Sololearn* 11/2025

Web Design for Beginners, *CODL, University of Moratuwa* 04/2025

Java Application Development Using Java SE, *University of Colombo School of Computing* 05/2024

Interests

Software Development | DevOps | Cloud Computing | Programming | AI/ML Technologies
